

## MEMORIES

Before they arrived, we had established a group to meet. Then they arrived in Samsun. The first day I was so excited. I spoke with Portuguese girls at the first. I can't forget it. We talked with others. After school we went to the dam. At the dam we learned of the transformation of the water into electrical energy. On the second day, we made our presentations about energy. We went to Botaş and we learned the correct use of energy. I was with the Bulgarians at the bus and the trip was great. We learned new information about naturel gas in Botaş. Only on wednesday we did shopping and we walked around. It was funny. On thursday day we went to Amasya. When we were returning from Amasya , we sang songs together. On Fiday we went to the museum then we went to the Piazza. We had lunch and we went to the game centre. We played games. We had dinner and we had an unforgettable night together. These were the last moments because we wouldn't be together. We ended the night in a sad mood. On Saturday we had the opportunity to meet with Portuguese girls. The others had gone. We walked around, had lunch and we went to the amusement park. I can't forget the fear in amusement machines. We left after spending a little more time. We were very sorry when we left. I miss everyone so much. I want to come together with them. ❤️

## ERASMUS+ JANUARY 2019 TURKEY MEETING

I did never want week to end. It was like a dream. I met perfect people. That's what made the whole week unforgettable. We was host for the first time when they came to Turkey. For this reason we felt so anxious and excited however we have more awareness about energy right now.

What can we do? How we use energy more wisely? We noticed our language skills developed as well.

We visited important energy sources centres in Samsun as **BOTAS** Natural gas Pipeline and Suat UĞURLU hydroelectric dams. We went to Amasya and we introduced the history of Amasya. We introduced Samsun where is a modern and also has a historical aspect as well.

The week in my life was one of the best under favour of teams. I believe they have a good impression for Turkey and they loved Samsun. I miss they and I want to be together again. I lived unique experiences with they and I learned many things. I would like to thank for golden hours all of them. I'll never forget those days.

## MEMORIES

Before the meeting whatsapp group was founded. We introduced with our friends in the group. We gave information about what we would do when they came here. When they come to our school at first we were excited and a little anxiety. Hanging out and doing shopping together were very enjoyable. It was very depressing that we know they would leave our country. The last day was probably one of the most important moments I have lived. It was very nice to be a host country for this project. It was a very different and an unforgettable experience for us.

## MEMORIES

This project is my second Erasmus+ experience. I visited a dam for the first time, learned how the system works and learned something about different cultures and countries. It is also the funniest project I've ever had. Because we hosted a really funny and friendly team in Turkey. In spite of tiredness, we had fun and laughed a lot in this period.

I would like to thank everyone who organized this project. It was one of the most enjoyable day of my life.

I loved them all separately. Well, we've hosted them. If they want to come to Turkey again in the future, we will always be here.

**Sena Duyar**

## MEMORIES

I was so excited when they came our school. We knew each other because we cahtted on whatsapp group. It was a different experience for us. I was anxious when they arrived our school. When we started spending time together my anxiety last. It was entertaining to go shopping and amusement park. It was very sad because we would leave. I had some unforgettable moments with them.
